Speakline

A speaking trainer for people with an important conversation ahead

Daulet — Product · Asylbek — Payments · Altair — Finance

7 November 2026

1 · Problem

“My interview is on Thursday, and I freeze when I talk”

33.7%

of US adults are afraid or very afraid of public speaking

63.0M

hires in the US in 2025 — and each starts with interviews

Episodes

the need peaks before the date and drops after it

The pain is real and frequent. The risk is retention, not demand.

Chapman Survey of American Fears 2025, n = 1,015 · BLS JOLTS · our pain-validation research, 28 Oct 2026

2 · Opportunity

People already pay for this pain

Company	Money	Context	Source
Vocal Image	$12M ARR	~50k payers, 20 people, $3.6M seed	TechCrunch, Aug 2025
Wellspoken	$12k → $16k → ~$40k / mo	Jan → Feb → Mar 2026, ~$10k self-funded, profitable	Founder, Richmond BizSense
Yoodli	$40M Series B	valuation over $300M, mostly enterprise	TechCrunch, Dec 2025
Speak	>$100M annualised	language learning — adjacent, not direct	Forbes via Benzinga
RiseGuide	grew 5× in a year	communication & charisma microlearning, 100+ people; $19.99 → $41.99 every 28 days	SKELAR job post, BBB, App Store
Orai	$2.3M raised, last 2019	generic “practise speaking” app stalled	Caplight

Not public: competitors’ ad spend (Meta shows spend only for political ads). PatterAI’s revenue exists only as a third-party estimate that contradicts its 177 live ads, so we leave it out.

North American public-speaking training market: $2.6–2.9B (Dataintelo / MarketIntelo)

What the leaders keep running

Brand	Active ads	Longest-running hooks	Running	Format → destination
Vocal Image	462	“How rare is your voice type? Take the test”	since 13 May	video 12s → web quiz
		“One Tap to Confidence · 50% see results in week 1”	since 19 Mar	image → web quiz
		“Your brain freezes when people are watching”	since 29 Aug	skit 102s
PatterAI	177	“91% sound noticeably sharper after 3 weeks”	since 18 Apr	static DCO → App Store
Wellspoken	9	“Stop sounding junior in important meetings”	since 12 Aug	video 30s → App Store
RiseGuide	14,006*	“Never ask “How are you?”” · articulation training 9 min a day	Feb–Jun 2026	skit 80–110s → web quiz

Meta Ad Library, active ads, all countries, pulled 2 Nov 2026. Vocal Image: 320 of 462 shown in the US; also live in ES, DE, FR · *RiseGuide: all US English ads ever run, each live 1–7 weeks, also in JA, AR, ES, FR, PT

Three patterns, and what we do with them

Pattern 1

A test is the hook

Vocal Image's 12s "voice test" ad has run since May

Our hook: 10-second voice test, result before paying

Pattern 2

Name the moment

Wellspoken: "important meetings"; VI: "brain freezes"

Our hook: the interview on Thursday

Pattern 3

Localise the funnel

VI: ?lng= web funnels, ads in ES, DE, FR

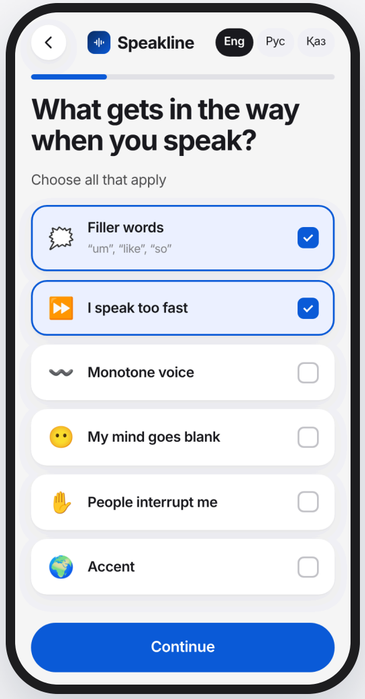

Our path: US first, then localised EU

In the model: CTR 1.5% today → 1.8% is lever 1 — a hypothesis to test, not a fact

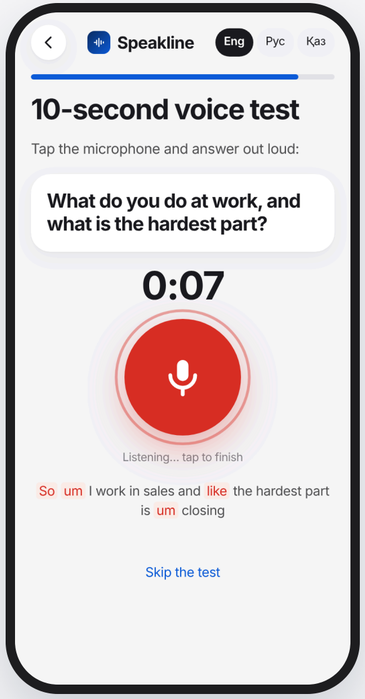

We do not copy "91%" or "50%" claims: we have no user data to back such a number yet

3 · Solution

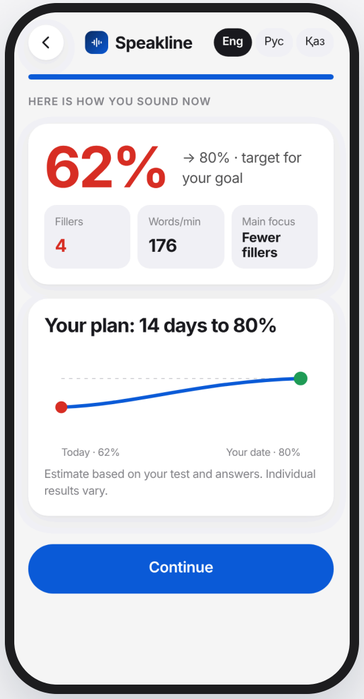

Hear how you sound in 10 seconds — before you pay

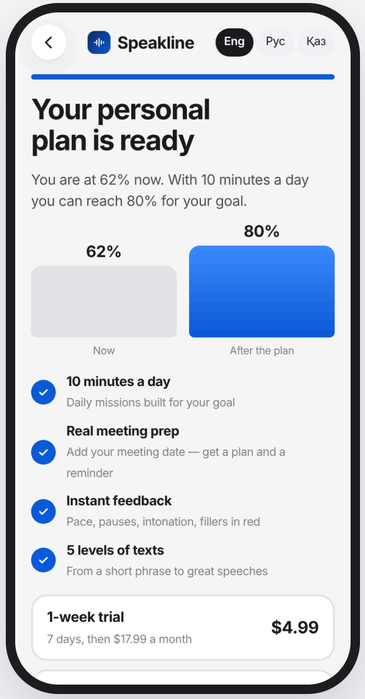

1 · Your occasion

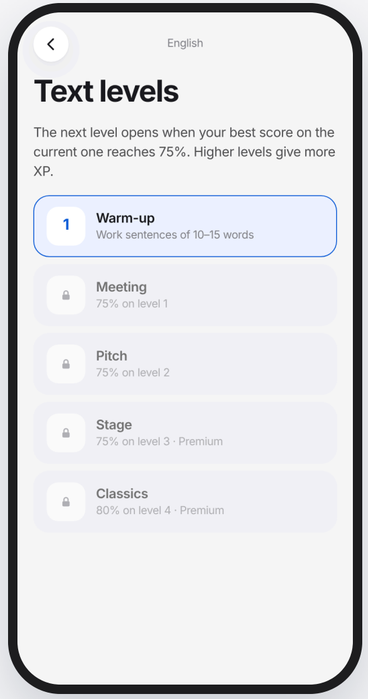

2 · Speak 10 s

3 · Feedback

4 · Plan to the date

5 · Daily drills

Working web funnel and app — try it on the Live Demo slide

4 · Business

Web-to-app subscription, sized to the event

Trial week

$4.99

then $17.99 a month; 45% of trials convert in the model

30% of payers

Monthly

$17.99

renews every month

30% of payers

3 months

$29.99

first payment, then $59.99 per quarter; preselected

40% of payers

Scenario pack

+$9.99

one-time: 10 situations + 6 ready scripts

15% take

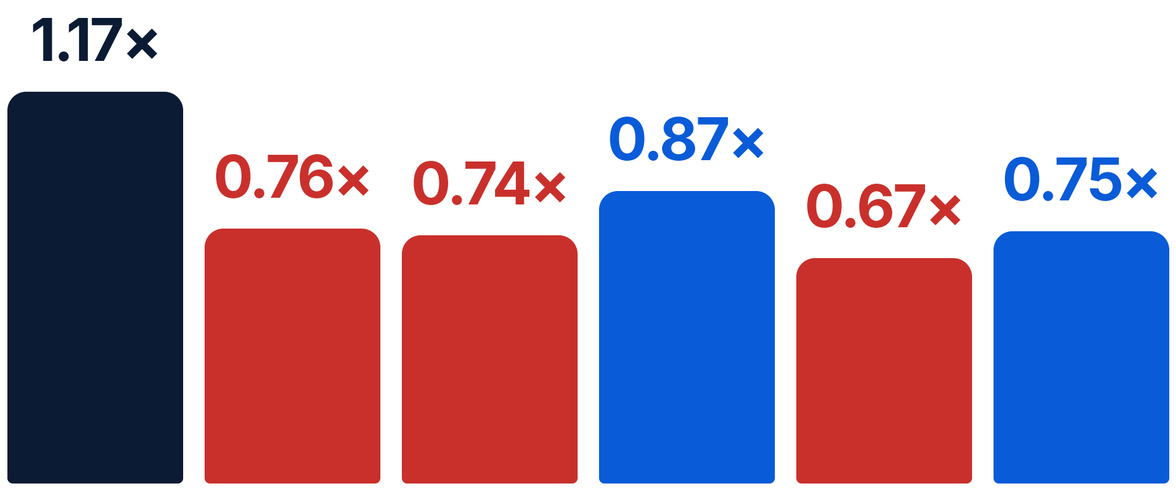

Paddle is merchant of record: it collects VAT and handles disputes — 5% + $0.50 per payment

Plan mix and conversion are assumptions from the model · Paddle pricing

5 · Numbers

Base case in the US: we do not buy traffic yet

12-month LTV / CAC

Base case, US

$68.87

CAC — to get one payer

$51.38

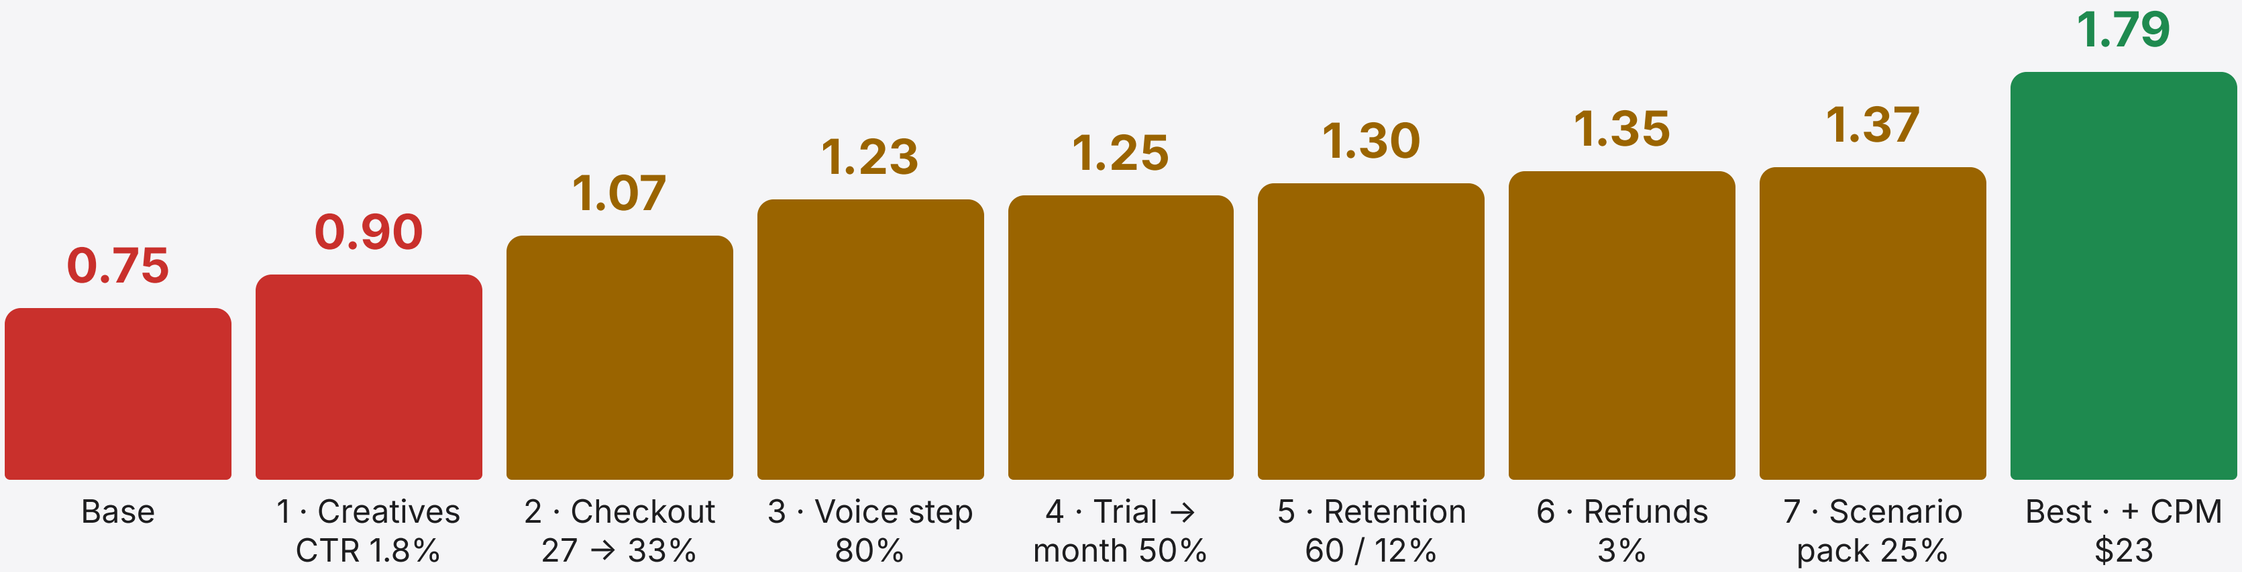

LTV — net money per payer in 12 months ($62.81 revenue; web median ≈ $67)

0.75× · no payback in 24 months · don't buy

CPM: Affect Group, US Sales objective Q4 2025 $20–30 (all-industry median $23, Superads) · AI per active user: 40 reviews = $0.34, cap 3 a day · Soniox 40 min = $0.08 · LTV benchmark: FunnelFox 2026 · Google Sheet

5 · Numbers · Levers

A ladder of levers: each step is one test

below 1.0 — don’t buy

1.0–1.5 — test

1.5 and above — scale

Cumulative: each bar adds one lever to the previous. Lever values are hypotheses; CPM $30; payback: step 2 = month 10, step 7 = month 6

5 · Numbers · Countries

Cheaper attention in Europe beats lower prices

Market	CPM (+ location fee)	Monthly	VAT	CAC	12m LTV	LTV/CAC	Payback
US	$30.00	$17.99	—	$68.87	$51.38	0.75	none
UK	$13.45 (+2%)	£14.99	20%	$37.05	$46.94	1.27	month 7
Germany	$13.11	€17.99	19%	$35.41	$47.46	1.34	month 6
Spain	$7.57 (+3%)	€12.99	21%	$21.06	$32.99	1.57	month 4

¼–½

European CPM vs the US; if UK CPM hits $20, UK drops to 0.85

−8 to −36%

LTV per payer after VAT and local prices

DE, ES

need the app in German and Spanish first

CPM: Adamigo 2026 medians × 1.3, the same uplift as the US; location fees: Aimerce; VAT included in price; FX GBP 1.3337, EUR 1.1170 (27 Oct 2026). Same funnel assumed; 3DS check: 85% pass in UK/EU (mandatory), none in the US

6 · Go-to-Market

US for the brand, the UK for the money test

Phase 1

US

Brand and creative test: voice-test hook vs “confidence” hook. About $1,700

Gate to next step

CTR ≥ 1.8%

Phase 2

UK

Same English product at less than half the CPM. Paywall test: $26.7k, ~13 weeks

Gate to next step

measured LTV/CAC ≥ 1.0

Phase 3

Germany, Spain

Localise the app and funnel first, the way Vocal Image did

Gate to next step

per-country ≥ 1.5

−$65k US base case at $8,670 a month: cash after 24 months, never breaks even

$14.4k UK at the same budget: most cash needed; breaks even in month 14

Google Sheet, block 10: ads and variable costs only, no salaries · UK uses the same funnel as the US (assumption)

7 · Live Demo

Try it now: speak for 10 seconds

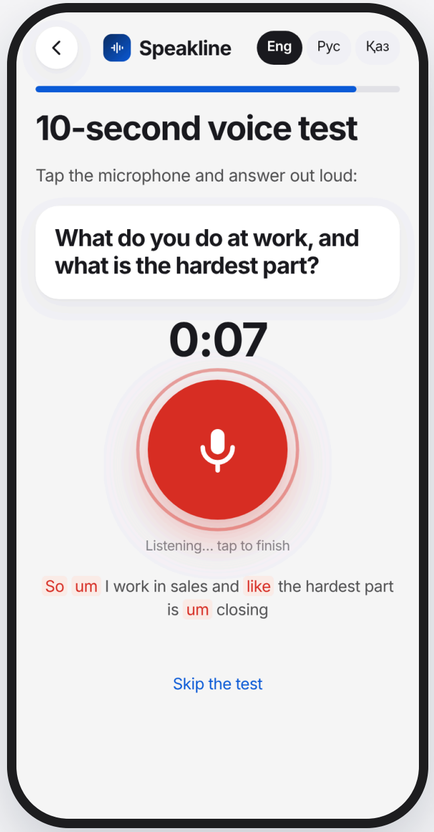

Landing → quiz

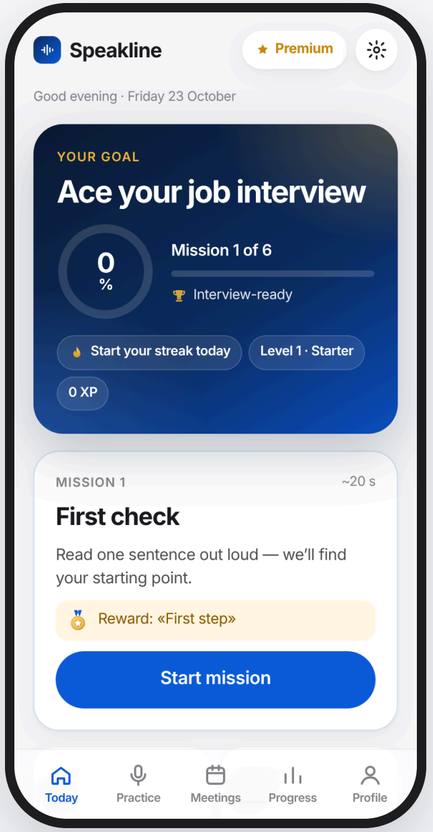

something02.github.io/Speakline/start — occasion, voice test, feedback, paywall

The app

something02.github.io/Speakline — drills, levels, AI coach, Pro

Best in Chrome: it asks for the microphone. Checkout is in test mode: no real money.

Backup: 2-minute demo video in the Capstone folder

8 · What’s Next

Three tests, sized before launch

Test	Primary metric (MDE)	Sample	US: cost · time	UK: cost · time
1 · Hook: voice test vs “confidence”	CTR 1.5 → 1.8%	57k impressions	$1.7k · 6 days	$0.8k · 3 days
2 · Paywall: your result + plan to your date on top vs current	pays 15 → 18% (UK)	4,800 paywall views	$48.0k · 166 days	$26.7k · 92 days
3 · Microphone in the Instagram browser	mic works on the phone	real iPhones, Androids	—	—

Test 2 in the US takes 5.5 months and $48k — so it runs in the UK

Fixed upfront: one metric, guardrails (refunds, CAC), full weeks, no peeking

α 0.05 two-sided, power 80%; MDE = the ladder targets · Google Sheet, block 9
